

Hello Romana,

I installed the FRENCH language pack you sent me and it is indeed a very important improvement.

Changing the language to French in the admin area does now change a lot of descriptions in POSTMAN already, but the most important things for now concern subscribers: the 2 links in the footer of each newsletter: EDIT SETTINGS and UNSUBSCRIBE.

I found the translation **UNSUBSCRIBE_LINK_TEXT** =« **se désabonner** in file **fr-FR.com_bwpostman.ini** on line 1079, but it doesn't replace the English link-text with the French one. Tested this by creating a **TEST**-newsletter in French (J4 admin and site set to French).

The link remains in English so it is probably **not the exact** ini .file. Could you please point me in the right direction for those English link-texts **Edit Settings** and **Unsubscribe** so I can change .the **corresponding ini files** via FTP. And you are right, using the Joomla override system is impractical (cluttered interface, confusing to work with).

In the beginning I can help the client with creating newsletters, but subscribers should be able to understand the footer links directly.

I have another potential client for POSTMAN, but I must be able to demo him/her a 100% French version of POSTMAN.

Thank you in advance,
Janbol
